

*Inspired by the beauty and
craftsmanship of traditional
wood windows, the strength
and durability of FiberCore™
and the ease of maintenance
of vinyl window systems,
Restorations windows are the
clear choice for homeowners
all across America.*

Restorations
Innovative Window Systems

Only the best windows for your home...

Your home is your biggest investment. Give it the extra boost of curb appeal you're craving.

Restorations® windows can give you a beautiful new view from both inside and outside your home. Choose from a wide variety of designer options and styles to find your perfect replacement window.

With Restorations, it's not just about finding a new window; it's about finding the window that will truly express your lifestyle and point of view.

Restorations
Innovative Window Systems®

Reducing Our Carbon Footprint

Green Starts with Energy Conservation.

Restorations® has made a commitment to improving the nation's environment. And we're doing it by not only providing energy efficient windows and doors that help conserve our nation's resources, but by also committing to "green" manufacturing principles.

Certainly, there are easier paths for manufacturers to follow. Designing and manufacturing with the environment in mind is no simple task. However, using technology to minimize scrap and waste, and by being vigilant in recycling items, all of us at

Restorations takes pride in knowing that we're doing the right thing for our country's environment.

Restorations provides some of this country's most energy efficient products; we're also doing our part in helping people save money on their home's heating and cooling costs.

Everyday, our nation's environment is put to yet another challenge... and at Restorations, we're addressing them one window at a time.

Industry Awards

We not only stand behind our beautifully designed, innovative products, but we also back up the entire window installation which is handled by our Restorations Dealer Network. Restorations has been selected for inclusion year after year in Window & Door Magazine's listing of The Top 100 Manufacturers. We are also the recipient of five of the industry's coveted Crystal Achievement Awards for product innovation and manufacturing quality.

Industry Partnerships

NFRC

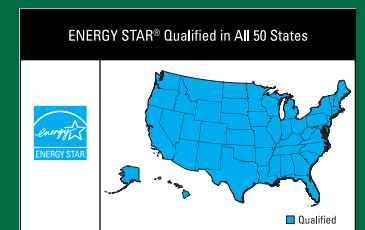

The National Fenestration Rating Council's (www.nfrc.org) Energy Performance Label provides "apples to apples" testing data in order to help consumers compare the performance characteristics of different brands of windows and doors. Restorations tests and certifies all of their products to these exacting standards.

ENERGY STAR

Energy Star (www.energystar.gov) is an United States Government supported program dedicated to helping consumers protect the environment through the investment in energy efficient products.

Restorations windows exceed Energy Star's performance guidelines in every state of the country.

AAMA

The American Architectural Manufacturers Association is the leading representing window, door, skylight, curtain wall and storefront manufacturers and their suppliers. As a member, we work to address critical issues in the industry and participate in efforts to shape the future for the industry.

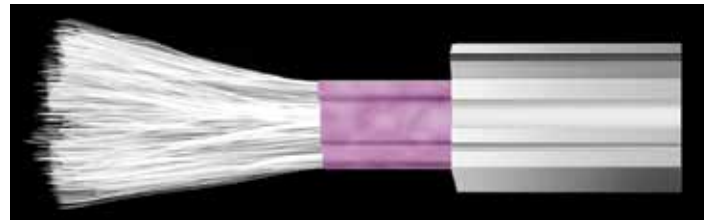

BBB

Restorations is proud to be an outstanding Accredited Business with the Better Business Bureau for more than fifteen years.

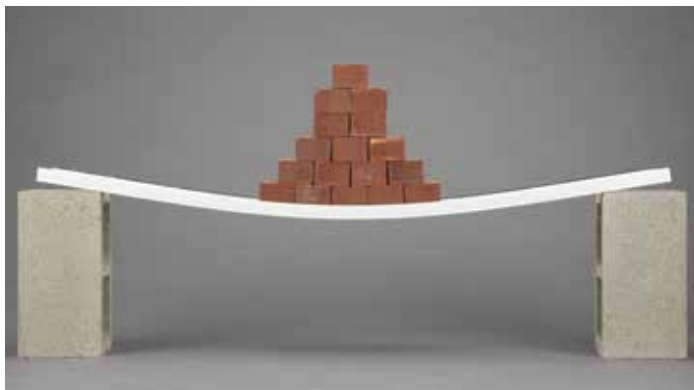

What's On the Inside...

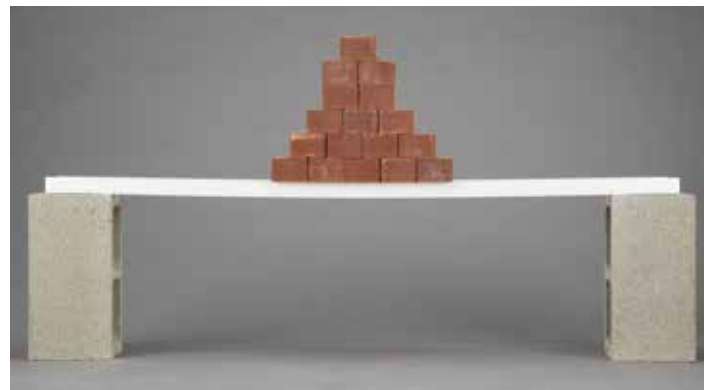

FiberCore™ FiberCore™ Fiberglass Structural Technology increases the strength and durability of Restorations windows making them nine times stronger than other vinyl windows. And by combining the strength of fiberglass with vinyl's easy maintenance, Restorations windows are guaranteed not to bow or flex, no matter how extreme the temperature gets.

Strands of reinforced glass fibers are soaked in resins, then pulled through heated dies to create FiberCore™, which is married to an exterior PVC surface, and fusion welded at the window corners.

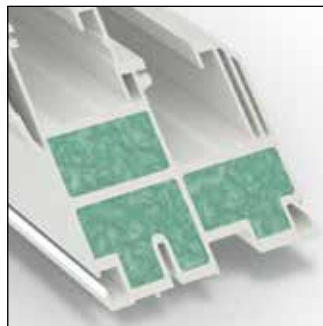

Vinyl Window

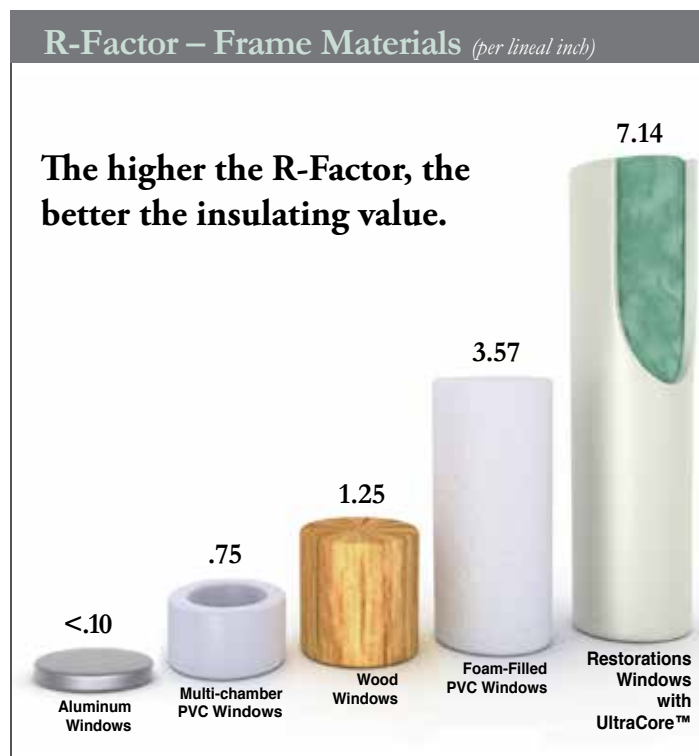

Restorations Windows with FiberCore™ Fiberglass Structural Technology.

New windows are an important, long-term investment. Homeowners want energy efficiency along with comfort and value in their replacement windows. Restorations windows with UltraCore™ polyurethane insulation are the most energy efficient choice — better than aluminum, wood or hollow vinyl, which makes them a good value now and in the future.

UltraCore™ works like the insulation used to insulate a cooler, thermos or refrigerator — helping to retain internal temperatures. In addition, UltraCore™ helps to prevent condensation that can lead to unsightly mold and damaged window sills.

Gives You a Great Look on the Outside...

Restorations windows are designed with the beauty of American architecture in mind. With our double coved and contoured window design, not only will your windows beautifully frame your view from inside your home, but your neighbors will envy the look of your home from the curb.

Painter's White Double Hung exterior featuring the beauty of our double coved and countered window design.

And a Better View!

Who wants to replace their existing windows only to find they have actually lost their view in the process? Our narrow line window design offers up to 27% more viewing area than other replacement windows.

Restorations Window

Four High Performance Insulated Glass Systems

Engineered For Wherever You Live

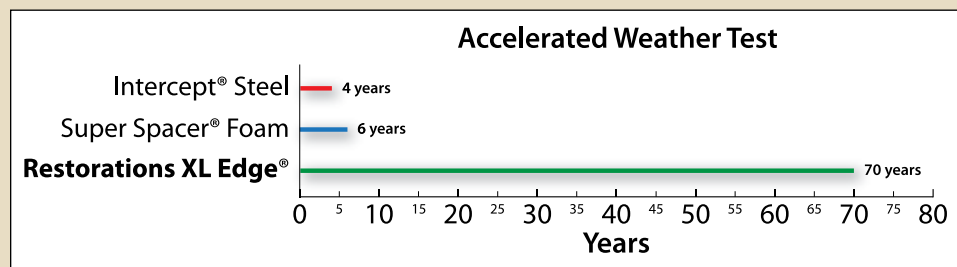

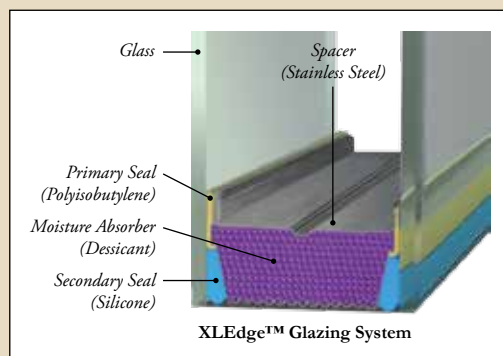

Most window manufacturers utilize the same type of insulated glass in all the windows they produce, regardless of whether the windows are installed in the cold north or the hot south. Restorations offers four high performance insulated glass systems, each of which is engineered to provide you the maximum thermal efficiency and comfort in the particular area of the country where you live. All of Restorations insulated glass systems are licensed and certified in accordance with the NFRC Certification Program. Please consult with your Certified Restorations Contractor to select which system will be best for your home.

0.42	0.1
Condensation Resistance	
70	

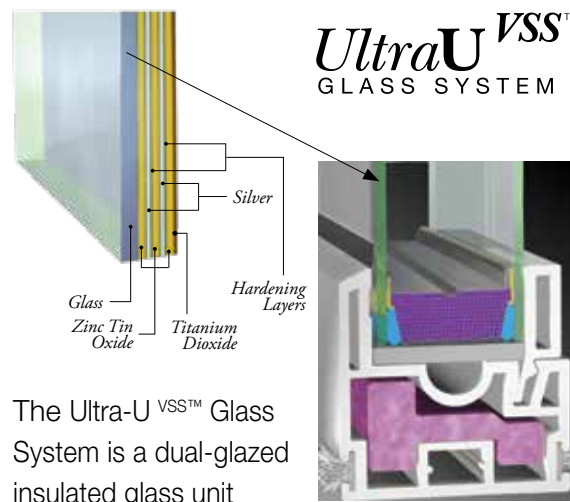

The tested air infiltration rate for a Restorations double hung is 0.04. The lowest NFRC rating published on any label is 0.1.

Built To Last

Occasionally, typical insulated glass units can develop moisture between the panes – an expensive and time-consuming issue to remedy. To prevent this, Restorations windows utilize the XLEdge™ Glazing System which features a double-sealed system, (unlike competitor's single seal systems), and a warm edge, structurally sound stainless steel spacer system. This means that, when tested under accelerated weather conditions, Restorations glass systems outlast the competition.

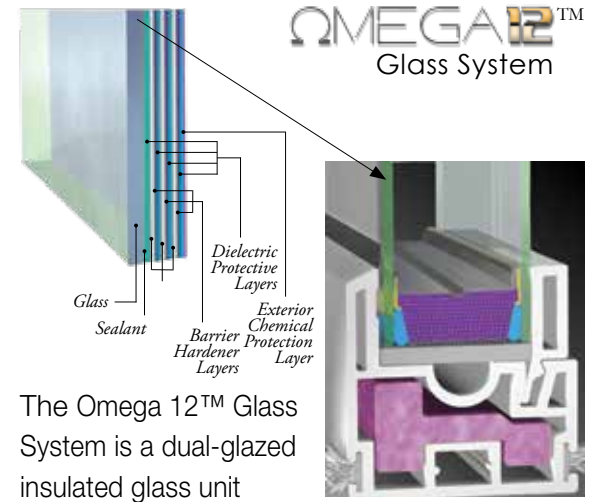

This chart shows the longevity of different types of insulated glass systems when tested under accelerated weathering conditions by an independent laboratory. The Restorations XL Edge Glass System outperforms and outlasts the competition.

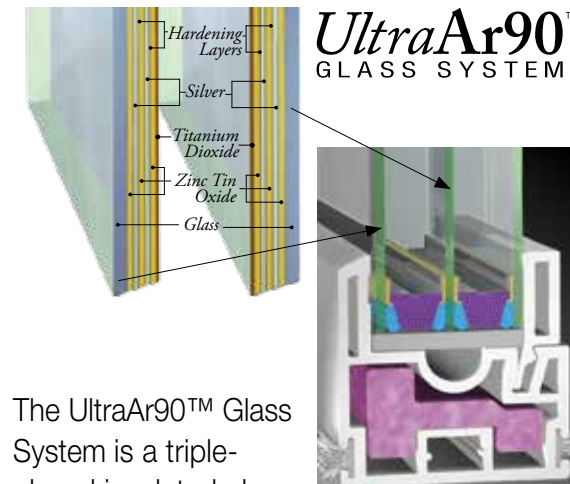

The Ultra-U VSS™ Glass System is a dual-glazed insulated glass unit featuring Ultra-U Plus™ glass, which consists of eight layers of high performance reflective metallic shields, the XL^{EDGE} spacer system, and an air space filled with high density argon gas.

Superior Performance

You'll benefit from Restorations advanced technology.

Glass That's Easy To Clean

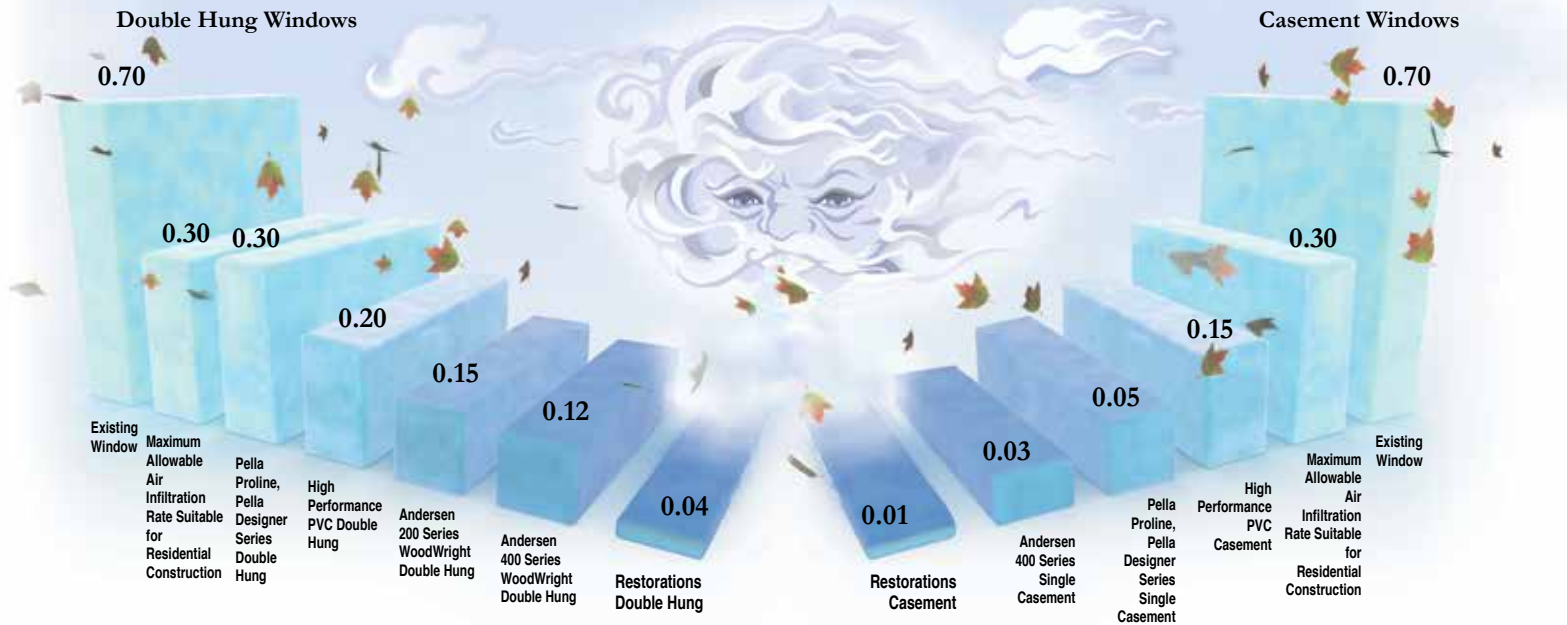

Windows with SolarClean stay cleaner longer and clean easier. SolarClean glass harnesses the power of the sun's UV rays to loosen dirt so water can rinse it away, leaving windows virtually spotless. The sun and rain finish the job. Titanium dioxide reacts chemically with the sun's UV rays, causing organic materials that are on the glass to decompose. It works even on cloudy days. When it rains, the decomposed dirt is rinsed away, leaving the glass almost spotless. SolarClean is an option on all Restorations windows and sliding doors.

Ordinary Glass

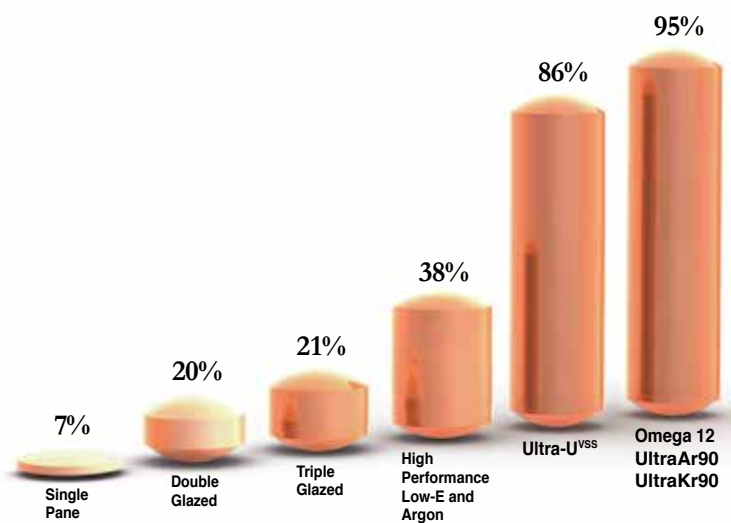

SolarClean™ Glass

Air Infiltration Rates

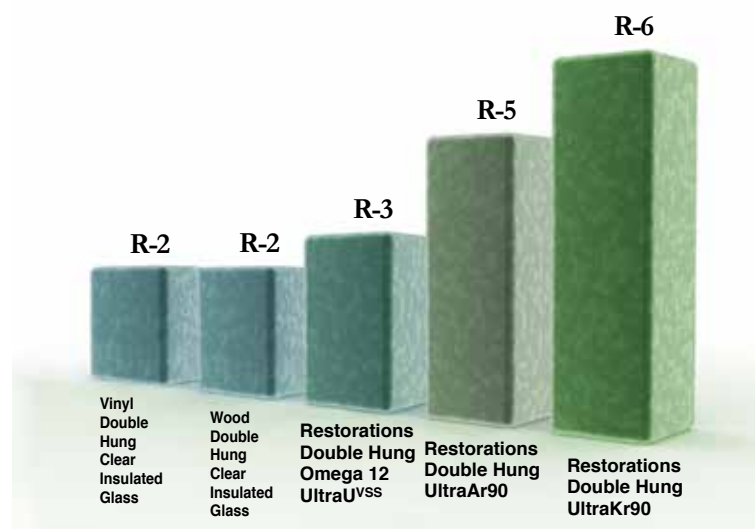

With a constant 25 mile per hour wind, this test shows how many cubic feet of air infiltrated through each square foot of the window each minute. The lower the number, the more air-tight the window. All results are from each manufacturer's published product specifications. (Andersen 01/2009 Performance Data Sheet; Pella 2010 Pella Commercial Solutions). Air infiltration results for Restorations Double Hung and Casement Windows are AAMA Certified Air Leakage Rate test February 2010.

Percent of Harmful UV Blockage

This chart shows the percentage of harmful UV rays, the primary cause of fading, that are blocked by different types of glass. The higher the percentage of blockage, the less likely you are to experience fading in your fine furnishings and fabrics.

Whole - Window R Factor

What are Highly Insulating R-5 Windows?

Highly-insulating windows with a whole-window R-value of 5 are the top tier of energy efficient windows for cold and mixed climates available today. Increasing the R-value from 3 to 6 reduces average heat loss through the window by 30% to 50%.

Guaranteed To Last A Lifetime

We take pride in putting our name and logo on every window we make, so you will always know the name of the company that stands behind your warranty.

Double Hung Windows

Restorations Double Hung windows will restore the essence of traditional beauty to your home.

Designed with all the beautiful features of traditional wood windows and combined with the performance of today's most technologically advanced glass systems, Restorations Double Hung windows offer you the very best in both beauty and performance. Your new windows are virtually maintenance-free, meaning you won't have to spend your time painting and staining so you can enjoy your free time doing whatever you like.

Optional Architectural Hardware

Antique Brass

Brushed Nickel

Oil-Rubbed Bronze

Q4 Quick Lock and Release System™ is standard on all Double Hung windows. The Q4 System integrates the tilt-in function into the lock lever and eliminates the need for unsightly surface mounted tilt latches.

Double Hung Features

- FiberCore™ structural sash stiles for maximum strength
- Draft-blocking triple weather-stripping seals offer the best in draft protection making your home more comfortable
- UltraCore™ polyurethane insulation insulates just like your refrigerator
- Coved interior glazing bead adds beauty, while contoured lift rails allow for easy and comfortable operation
- Pre-tensioned, dual pulley Block & Tackle balance system for a lifetime of worry-free operation
- Pick-resistant Q4 locking system provides added security, and ventilation night latches allow you to enjoy a nice breeze without fully opening your window
- Extruded aluminum screen frame for a lifetime of trouble-free performance

SecureSeal meeting rail features the Q4 Quick Lock and Release System™ and FiberCore™ structural sash rail.

Double Hung windows tilt-in for easy cleaning.

Sliding Windows

Glide into a whole new frame of mind with our superbly designed two- or three-lite sliding windows.

Sliding windows offer the appeal of traditionally styled windows, but give all the great performance benefits advanced technology has to offer. With our specially designed weather-stripping system, no matter how the wind blows you'll maintain a greater level of comfort than with traditional Sliding windows.

Available in your choice of colors and glass styles, your new Sliding windows will bring splendor and comfort to your home. Select from a standard slider with lift out sashes or the tilt in slider with easy swing in sashes for a greater view of the great outdoors all from the comfort of your home.

English Walnut Tilt-In-Slider with both sashes tilted in for ease of cleaning (left).

Revive.

Sliding Window Features

- Easy lift-out sashes on the traditional sliding windows
- Narrow line window design for greater visible glass area
- FiberCore™ structural sash rails for added strength
- UltraCore™ polyurethane insulated windows offer higher resistance to heat and cold providing you with added comfort
- Coved interior glazing bead for added beauty

- Tandem dual brass rollers with stainless steel axle for easy sliding – Lift-Out Only
- Pick-resistant locks provide added security
- Ventilation night latches allow safe venting for air flow
- Extruded aluminum screen frames with heavy-duty aluminum corners for a lifetime of worry-free performance

English Walnut woodgrain.*

These Operating Casement windows come standard with our low profile full-flip nesting handle and three-point security locking system. The windows are shown in Colonial Cherry Woodgrain with matching two-tone Simulated Divided Lites. (left).

Casement & Awning Windows

Gain a whole new perspective on beauty with our Casement and Awning Windows.

Enjoy the versatility and stunning good looks of your new Restorations Casement windows. The easy operation of our stylish and functional hardware allows your windows to open to a full 90° for safe and trouble-free cleaning from inside your home.

Comfort comes standard with your new Casement windows, which have one of the lowest air infiltration rates in the industry. Built to last, these windows feature dual continuous seals of weather-stripping to ensure every day will be a comfortable one no matter what the season, so you can say good-bye to uncomfortable drafts.

These two openings feature an Awning window combined with a Picture window. Restorations' Awning windows feature two locks and a low profile full-flip nesting handle.

Renovate.

SmartTrim™ pre-finished color coordinated casings and extension jambs, create an authentic looking maintenance free window installation

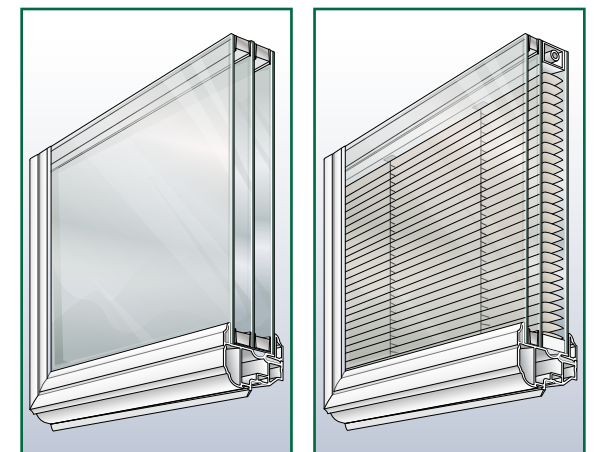

Looks Like a Double-Hung, Performs Like a Casement
The Simulated Meeting Rail option provides higher structural performance levels than a traditional Double Hung, with the ability to meet egress requirements in smaller unit sizes.

Casement & Awning Window Features

- Stepped internal and contoured external design maximizes the beauty while minimizing the appearance of the frame and sash
- Low profile, single-lever locking handle controls up to three locking points for added security
- Squareness ensured through adjustable hinge system
- Dual weather-stripping system with compression and primary weather seals protects against drafts
- FiberCore™ structural sash stiles for maximum strength

Optional Performance Sash System

- 1 3/8 inch overall triple-glazed insulated high performance glass package
- Optional deeper sash allows for the combination of ENERGY STAR qualifying glass system with SunBlinds®
- Beautiful contoured exterior sash style

Optional Architectural Hardware

Sliding Door

Open your home up to greater possibilities with our elegant Sliding Door.

Restorations Sliding Doors are also available in configurations up to twelve feet wide, where the center section slides and the two end sections are stationary.

White interior Sliding Door with contour grids between the glass and Forever Finish Brass Handle set.

Renew.

Create a Statement of Sophistication

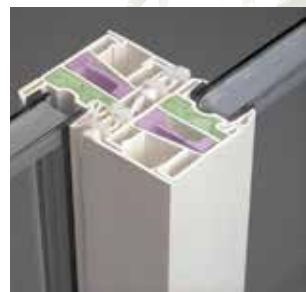

Benefit from greater views without compromising security or comfort with a new Restorations Sliding door. Built with big views and high performance in mind, your new sliding door has 1" thick tempered safety glass encapsulated by an impressive sculpted sash frame for added architectural detail. The structural three-point locking system is actuated with just a turn of the knob or the use of a key for easy operation and even greater security.

Sliding Door Features

- Forever Finish Brass handle eliminates chance of tarnishing and pitting
- Three-point locking system for added security and peace of mind
- Optional combination ventilation and dead bolt foot lock for greater security and convenience
- QuadSeal™ weather-stripping provides protection from drafts and offers twice the amount of weather-stripping used on most other doors

Every Restorations Sliding Door incorporates a concealed three-point locking system, which is recessed in the door panel. Three locks simultaneously engage into the keepers in the door jamb when the door is closed.

FiberCore™ structural meeting rail stiles for added strength, UltraCore™ insulation for enhanced efficiency and our exclusive Clash Free Interlock.

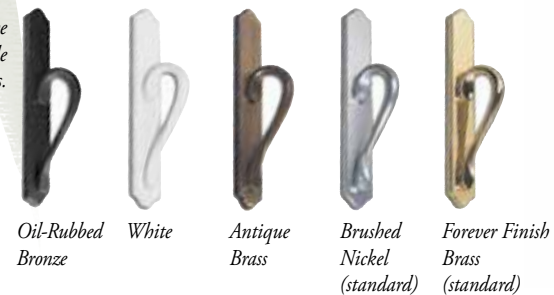

Twin tandem oversized 1 1/2" diameter steel rolling system for a lifetime of undisturbed operation.

Top hung screen provides smooth trouble free operation with no hang-ups.

Choose from five spectacular handle set finishes.

Beautifully finished key lock provides added security.

This tan five-lite Bow window features all 5 lites with exterior color matched Georgian two-tone Colonial grids and two operating Casement windows. (above).

This five section Brazilian Pecan Bow window features Georgian two-tone grids, as well as two operating Casement windows and three center fixed panels, finished with SmartTrim™ 3 1/4" Brazilian Pecan Colonial casing. (above).

Projected Windows

Give Your Room a Beautiful View!

Old existing wood window with a center mullion that obstructs the view and is not energy efficient.

Projected Frame Window featuring a one-lite Awning window with Golden Oak interior and maintenance-free Pionite® on the head, seat, and side jambs.

Endless possibilities exist when it comes to providing a classic look for your home. Our custom sized Projected Frame Windows can be built with virtually any type of window, glass design, and color combination in order to give your room a beautiful view.

Let the Sun Shine Through Your New Garden Window

Add more light to your kitchen or bathroom with a Restorations Garden window. With a streamlined frame design, we have mastered the balance between beauty and performance.

Corian® Seatboard Colors

Black Pearl Platinum Granite White Quartz

Vanilla Sugar Arctic White

Exterior view of our Garden window with casement sash open for ventilation.

Our Garden window, shown here in White, features operating trapezoid Casement windows that open on each end and an adjustable 3/8-inch thick glass shelf with polished edges, brackets and standards. This window is also shown with an optional Pionite® laminated seatboard.

Blinds

They're Sealed Between the Panes of Glass and Guaranteed to Last a Lifetime

Exclusively from Restorations windows, SunBlinds are The Blinds You Never Clean! These adjustable mini blinds are actually sealed between the panes of glass, offering less maintenance with more style. SunBlinds are available in five distinctive slat colors and two beautiful styles, Tilt-Only and Lift and Tilt, to complement our array of traditional window styles.

Magnetically controlled operator is used on windows with Tilt-Only SunBlinds.

The Tilt-Only blind operator on Casement and Awning windows allows for operation of the blind, without removing the screen.

Top Slide Magnetic operator for tilting the blind slats on Lift and Tilt Patio Door blinds.

Magnetic operator and cord is used on larger Sliding doors and with colored SunBlinds.

Side Slide Magnetic operator for raising and lowering the blind assembly on Lift and Tilt Patio Door blinds.

Tilt Only Magnet & Wand (Clear) Sliding Door Only

**Not available on Tilt-Only Casement and Awning SunBlinds.*

- Better Airflow
- Enhanced Curb Appeal

OptiView is standard on all Restorations windows and an option on Restorations Sliding Doors.

An Investment That Can Save You Money

Use these charts to estimate the amount of money you will be spending over the next ten years to heat and cool your home if you do not replace your existing windows. Then, estimate what your potential savings can be when you replace your old windows with new high performance Restorations windows.

How much do you currently spend to heat and cool your home?

Average Monthly Heat & Cooling Costs	\$150	\$200	\$250	\$300	\$350
Year 1 Cost	\$1,800	\$2,400	\$3,000	\$3,600	\$4,200
Year 2 Cost	\$1,890	\$2,520	\$3,150	\$3,780	\$4,410
Year 3 Cost	\$1,985	\$2,646	\$3,308	\$3,969	\$4,631
Year 4 Cost	\$2,084	\$2,778	\$3,473	\$4,167	\$4,862
Year 5 Cost	\$2,188	\$2,917	\$3,647	\$4,376	\$5,105
Year 6 Cost	\$2,297	\$3,063	\$3,829	\$4,595	\$5,360
Year 7 Cost	\$2,412	\$3,216	\$4,020	\$4,824	\$5,628
Year 8 Cost	\$2,533	\$3,377	\$4,221	\$5,066	\$5,910
Year 9 Cost	\$2,659	\$3,546	\$4,432	\$5,319	\$6,205
Year 10 Cost	\$2,792	\$3,723	\$4,654	\$5,585	\$6,516
Total for 10 Years	\$22,640	\$30,187	\$37,734	\$45,280	\$52,827

Calculations are based upon a projected annual increase of 5% for heating and cooling cost.

How Much Can You Save?

Potential Savings of 20%	\$4,528	\$6,037	\$7,547	\$9,056	\$10,565
Potential Savings of 30%	\$6,792	\$9,056	\$11,320	\$13,584	\$15,848
Potential Savings of 40%	\$9,056	\$12,075	\$15,093	\$18,112	\$21,131

Beauty, Elegance,
Satisfaction, and
Peace of Mind.

We Stand Behind the Window and the Installation.

Lifetime Non-Prorated Transferable Warranty

Restorations Windows warrants to you, the original purchaser of Restorations Windows, that under normal use this product will be free from defects in material and workmanship for as long as you own or reside in the home in which the windows and patio doors were installed.

PVC Frame and Sashes – Lifetime Non-Prorated Transferable Warranty

The welded corners will never separate. The PVC extrusions will not CHIP, CRACK, DELAMINATE, PEEL, FADE, BLISTER, PIT, or WARP for as long as you live in your home. This warranty is transferable to the next homeowner.

Hardware – Balances – Other Moving Parts – Lifetime Non-Prorated Transferable Warranty

All of the hardware (the balances, the tilt latches, the crank mechanism, the rollers and all other hardware components) is warranted against breaking, cracking, or otherwise failing, for as long as you live in your home. This warranty is transferable to the next homeowner.

Insulated Glass – Lifetime Non-Prorated Transferable Warranty

The insulated glass seal will not fail for as long as you live in your home. Insulated glass with SunBlinds between the panes are also covered for as long as you live in your home. The insulated glass unit is warranted to be free from material obstruction of vision caused by film formation or dirt collection between the interior glass surfaces under Federal Specification DD-G-451C.

The appearance of condensation or frost on the inside surface of the insulated glass does not indicate a defective seal, or an improper installation, or faulty workmanship. This is a direct result of excess moisture in the house. When transferring the warranty, the second property owner will be entitled to a 50% discount on the cost of a new insulated unit, should the original become defective as a result of the above reasons. However, if the insulated glass unit should fail prior to ten years after the original window or door purchase, the replacement unit will be at no charge.

Glass Breakage – Lifetime Non-Prorated Warranty

If the insulated glass in any Restorations Window installed in your home should break or crack for any reason, then Restorations Windows will provide, at no charge, a new piece of insulated glass.

Screen – Lifetime Non-Prorated Transferable Warranty

The screen frame is warranted against cracking, breaking, warping, or otherwise failing for as long as you live in your home. Fiberglass screen cloth will not tear or rip. If it does, Restorations Windows will provide new fiberglass screen cloth at no charge. This warranty is transferable to the next homeowner.

Installation

Restorations Windows warrants that the Certified Restorations Professional Contractor will install the windows and doors in your home in accordance with Restorations Windows factory recommended installation specifications.

Condensation

The appearance of condensation or frost on either the inside or the outside surface of the insulated glass unit does not indicate a defective seal, or an improper installation, or faulty workmanship. This is a direct result of excess moisture in the house or exterior condensation.

Procedure

Restorations Windows or an authorized representative, reserves the right to inspect any window or door for which a warranty claim is made. Restorations Windows will then forward to the Certified Restorations Professional Contractor the warranted parts at no charge. All claims should be made to the Certified Restorations Professional Contractor. In no event shall Restorations Windows be liable for special incidental or consequential damages, or for any delays in the performance of the warranty due to circumstances beyond its control.

The Fine Print

Caulking, which is required in most installations, is not covered by this warranty. The only issues which could void this warranty are acts of God, misuse or abuse. For commercial applications, the warranty is limited to 50 years.

Warranty Transfer

This warranty can be transferred to a second homeowner free of charge. Please fill out the warranty transfer card and mail to Restorations Windows.
